1. EUPHA update

EUPHA joins the European Health Information Initiative (EHII)

EUPHA has joined the Steering Group of the European Health Information Initiative (EHII). EHII is a multi-stakeholder WHO network aimed at creating an integrated, harmonized health information system for the entire European Region by fostering international cooperation.

EUPHA will be represented by the President of the EUPHA Section on Public Health Monitoring and Reporting, Dr Nicole Rosenkötter from the NRW Centre for Health in Germany. Other members of the EHII Steering Group are EU Member States, WHO-collaborating centres, multi-country information networks. In addition, the European Commission and OECD participate in the Steering Group. The Steering Group is chaired by Annemiek van Bolhuis, National Institute for Public Health and the Environment, The Netherlands.

6th European Conference on Migrant and Ethnic Minority Health, EUPHA MEMH 2016

Oslo, 23-25 June 2016

Theme of the 6th European Conference on Migrant and Ethnic Minority Health is '**Equity – the Policy Practice Gap**'. Plenary sessions and presentations will focus on socio-demographic and political determinants for health and the policy environment with relevance for migrants, ethnic minorities, asylum seekers, refugees, undocumented migrants. Other topics include: access and quality of health care services; disparities and inequities, social exclusion and marginalization, health system responsiveness to diversity empowerment and levers for change, etc.

More information: [EUPHA MEMH 2016](#).

2. European Public Health Conference

Vienna 2016: the place to be

Abstract Submission opens 1 February

Abstract submission does not have to be confined to the conference theme 'All for Health – Health for All'. Abstracts are invited for workshops, oral presentations, pitch presentations and posters. Prizes will be awarded for the best oral, poster and early career professional's presentation. Do not miss the opportunity to be recognised for your hard work. Abstracts and workshop proposals can be submitted [here](#).

Preconferences, Lunch Symposiums, Exhibition

The EPH Conference offers interesting opportunities for preconferences and lunch symposiums. If you have ideas for a lunch symposium, preconference or an exhibition stand at the conference, please contact office@ephconference.eu

Registration

Registration for the 9th EPH Conference opens 1 March 2016. We are expecting over 1,100 delegates. Don't miss the biggest public health event in Europe and register early to benefit from the reduced rates.

The 9th EPH Conference is held in the modern Austria Center Vienna, only a few U-Bahn stops from the centre of Vienna.

3. EUPHA members update

SFSP

Prochaine Assemblée générale de la SFSP, Mardi 29 mars 2016 de 14h00 à 18h00. For more information: <http://www.sfsp.fr/activites/detail.php?cid=302>

NIVEL

The new executive director NIVEL is Prof Dr Cordula Wagner. She succeeded Prof Dr Peter Groenewegen per 1 January 2016.
For more information click [here](#).

4. European Journal of Public Health

The [European Journal of Public Health](#) is a multidisciplinary journal in the field of public health. The EJPH is published bimonthly. The journal provides a forum for discussion and debate of current international public health issues with a focus on the European region. In 2014, the impact factor of the journal is at 2.591. The 5-year impact factor is 2.512. The EJPH is the official journal of EUPHA.

Chafea call for tenders

[Call for tender No Chafea/2015/Health/08](#)

The contract consists of a study which will look at three issues:

- 1) Analysis of the level of penetration or adoption of integrated care models in health systems;
 - 2) Analysis of the readiness of health systems to successfully implement integrated care;
 - 3) Development of a framework of indicators to use for assessing the performance of integrated care.
- As for the first part, the contractor is expected to illustrate the level of penetration or implementation of integrated care models or interventions by mapping out existing national strategies, policies etc. for the implementation of such integrated care models or interventions.

As regards the second part, the analysis could build on existing tools used for assessment of readiness of health systems for integrated care. However, the contractor is expected to develop a specific analytical framework for the purposes of the present contract.

As for the third part, the contractor is to develop a framework of indicators to use for assessing the performance of integrated care implementation. As a basis, the contractor may take into consideration the OECD's Health Care Quality Indicators concept with its effectiveness, safety, responsiveness/patient's centeredness, accessibility and **cost/expenditure dimensions; still, the contractor is expected to develop a specific assessment framework for the purposes of the present contract.**

Deadline: 1 March 2016

[Call for tender No Chafea/2015/Health/05](#)

The tender aims to provide services in support of the implementation of the Decision no 1082/2013/EU on serious cross-border threats to health", by creating conditions to strengthen and enhance coordination between Member States, international level and the Commission in order to ensure a coherent and consistent policy approach to effectively manage responses to serious cross-border threats to health across the EU. The tender addresses the three following areas of the above-mentioned decision:

Preparedness and response planning

Risk monitoring and assessment

Risk management and crisis communication

The activities to be carried out will be implemented through 4 separate lots, as follows:

Lot 1: Organization of exercises

Lot 2: Organization of events

Lot 3: Organization of trainings

Lot 4: Production of dissemination materials

Deadline: 9 February 2016

[Call for tender No Chafea/2015/Health/06](#)

This action has two main objectives:

1) Strengthening capacity of Member States' health authorities to effectively use ESIF in health, by:

(i) supporting exchange of information, innovative ideas and processes, and success factors among Member States on effective use of ESIF and other funding for health; and

(ii) providing health-specific assistance and expertise to participating Member States;

2) Study: Building knowledge on, and assessment of, ESIF interventions in health within the period 2014-2020 by:

(i) furthering knowledge on Member States' health-specific interventions co-financed with ESIF and, as relevant, other identifiable funding, to translate policy priorities into investments;

(ii) developing lessons learned on health investments; and

(iii) elaborating conclusions and recommendations on investments in health, in view of evolving policy priorities.

Deadline: 9 February 2016

[Call for tender No Chafea/2015/Health/38](#)

The objective of this call for tender is to provide sound evidence about the sexual health, including new behaviour trends in life style and behaviour of men who have sex with men (MSM) in Europe. And at same time, to assess and define the knowledge, attitudes and practices that should be employed to ensure the effective implementation of targeted prevention strategies by community based health workers (CHW), when providing health services for men who have sex with men. This call is a re-launch of Chafea/2015/Health/04

Deadline: 9 February 2016

[Call for tender No Chafea/2015/Health/37](#)

The objective of this call for tender is to carry out 2 studies:

a study on the added value of a strategic and life-course approach to vaccination. This study shall provide evidence that immunisations against some of the more specific age-related health challenges – such as pneumococcal disease, herpes zoster, and others – are economically feasible investments that can create large public health benefits, contributing to healthy ageing by limiting the burden of illness linked to vaccine-preventable diseases.

a study on shortcomings related to low vaccination coverage in health care workers. This study shall identify evidence and best practice in order to provide guidance for establishing health care worker (HCW) immunisation policies which defines the minimum immunisation standards for health service

employers to adopt in their workplace to protect employees and patients from the potential threat of exposure to vaccine-preventable diseases. These studies are intended to inform on-going explorations regarding the Commission's future vaccination policy referred to the background of the Council conclusions on vaccinations, as an effective tool in public health
Deadline: 9 February 2016

6. Interesting news

Health Europe

Health Europe - a multimedia conference bringing together healthcare policy, theory and practise from across Europe, featuring case studies and innovations has a limited number of FREE PLACES available to publically funded organisations for either attending on the day or e-delegates. Call +44 (0)161 743 4544 for more information. The offer applies to the following job titles: Director; Head; Lead; Commissioner for attendees, or any management level for e-delegates. Health Europe will be held 25 May 2016 in London, UK. More information: www.healtheurope.eu

Project INTEGRATE

Developing a framework to guide managers on the key factors for success in integrated care initiatives. For more information, click [here](#).

EP votes for regulations on baby foods

The European Parliament today voted to reject draft EU rules on baby food, which would have allowed baby foods to contain high levels of sugar and products to be labelled for use from 4 months of age. The European Commission (the EU's civil service) now has to bring the regulations into line with the sugar recommendations from the World Health Organisation (WHO) and the World Health Assembly's requirement that baby foods are not marketed for use before 6 months of age (WHA) and resubmit them.

Interesting articles from Science Daily

Chronic kidney disease prevalence varies greatly across Europe

The prevalence of chronic kidney disease varies across European countries, ranging from 3 percent to 17 percent. Differences in rates of diabetes, hypertension, and obesity -- which are risk factors for chronic kidney disease -- do not account for this variation.

Sharing of research data and findings should be the norm in public health emergencies

Opting in to data sharing should be the default practice during public health emergencies, such as the recent Ebola epidemic, and barriers to sharing data and findings should be removed to ensure those responding to the emergency have the best available evidence at hand, according to Vasee Moorthy and colleagues from the World Health Organization (WHO) in a Policy Forum article published in PLOS Medicine.

<http://www.sciencedaily.com/releases/201...>

The science: Is there any way to stop people from gorging on sugary drinks?

The ants in my kitchen, unable to resist, have clustered around a drop of sugar water spiked with poisonous levels of boric acid. They drink until they die. Humans are similar, except we don't need the boric acid; the sugar water itself — in the form of juice, energy drinks, and soda — is the poison. At least it's poisonous when we suck it down in heroic quantities, until we gain weight, develop type 2 diabetes, and descend into metabolic malfunction.

Ending Childhood Obesity

25 January 2016 -- The Commission on Ending Childhood Obesity launched its final report today, to address the alarming levels of childhood obesity and overweight globally. The report proposes a range of recommendations for governments to reverse the rising trend of children aged under 5 years becoming overweight and obese. Currently, 41 million children in this age group are obese or overweight.
