1. 7th European Public Health Conference, Glasgow

The 7th European Public Health Conference will be held in Glasgow, Scotland from 19 to 22 November 2014. The theme for the conference is ***Mind the gap: reducing inequalities in health and health care.***

GLASGOW: THE PLACE TO BE!

Don't miss the opportunity to present your work to the largest public health audience in Europe. Abstract submission is open at http://www.eupha.org/site/upcoming_conference.php?conference_page=398

Please check the conference website at www.eupha.org/glasgow2014 regularly for updated information.

2. EUPHA update

EUPHA supports manifesto: *From public to planetary health*

In a recent commentary in the Lancet (8 March 2014), several renowned public health researchers – including our President-elect – call for a social movement to support collective public health action at all levels of society – personal, community, national, regional, global and planetary. Their manifesto aims to create a movement for planetary health that takes into account our interdependence and the interconnectedness of the risks we face. The manifesto emphasizes the need for a new vision of cooperative and democratic action at all levels of society and a new principle of planetism and wellbeing for every person on this Earth. “The role of public health professionals as the independent conscience of planetary health fits perfectly within the future strategy of EUPHA, where investing in a future generation of connected and engaged public health professionals is one of the priorities”, says Walter Ricciardi, EUPHA President. <http://www.eupha.org/site/publications.php>

EUPHA section on Health Impact Assessment

We are pleased to announce that Odile Mekel from Germany is the newly elected president of the EUPHA section on Health Impact Assessment. She will be assisted by the newly elected vice-president from Spain: Piedad Martin Olmedo. We would like to thank the outgoing presidents - Rainer Fehr and Gabriel Gulis – for their excellent work in putting this section on the agenda.

EUPHA Collaboration

- **International Conference on Urban Health – March 2014**

We would like to thank the organisers of the ICUH conference in Manchester, where EUPHA was a partner. The conference, with over 800 participants, was a successful event and we look forward continuing our efforts in the field of Urban Health. Details on the conference can be found at: <https://www.icuh2014.com/>

- **European Conference on Migrant and Ethnic Minority Health – April 2014**

The EUPHA Section of Migrant and Ethnic Minority Health is organizing the next European Conference on Migrant and Ethnic Minority Health in Granada 10-12 April 2014. The website link is: <http://www.eupha-migranthealthconference.com/>

- The EUPHA Section on Health Services Research is co-organising the HSR-Europe meeting ‘**The international dimension in comparative health services research**’, to be held at NIVEL offices on 15-16 May 2014 in Utrecht, the Netherlands.

- **LEPH2014: The 2nd International Conference on law Enforcement and Public Health**
EUPHA is supporting the 2nd International Conference on Law Enforcement and Public Health (LEPH2014). The conference will be held at the Free University, Amsterdam, 5 – 8 October 2014. The conference is organised by the Centre for Law Enforcement and Public Health (CLEPH), Melbourne, Australia in collaboration with the Free University, Police, and Public Health Services, Amsterdam, Netherlands. More information: www.leph2014.com

3. Call for proposals, job opportunities

CESP (France) - Call for applications for the position of Director

The Centre for research in Epidemiology and Population Health (*Centre de recherche en Epidémiologie et Santé des Populations*, CESP, Villejuif, <https://cesp.inserm.fr/en/>) invites applications for the position of its Director for the period 2015-2019, renewable. This is a position with tenure, either as Professor at Paris Sud University or Research Director at Inserm, the French National Institute for Health and Medical Research (*Institut national de la santé et de la recherche médicale*, <http://english.inserm.fr/>).

All applicants must have a doctoral degree in epidemiology, biostatistics or equivalent. They must also have a successful track record of funded research and a reputation for excellent scholarship; teaching experience is also appreciated. The successful candidate is expected to have strong leadership and management skills; French language skills are an advantage. The CESP was created by Inserm, Paris Sud University and Versailles Saint Quentin en Yvelines University. It has close links with the Paris University Hospitals Network (*Assistance publique - Hôpitaux de Paris*, AP-HP), Gustave Roussy cancer campus (*Institut Gustave Roussy*, IGR), and the French National Institute for Demographic Studies (*Institut National d'Etudes Démographiques*, INED). The Director will lead an exciting and innovative academic centre, entirely devoted to public health research. It is made-up of over 250 scientists and technical and administrative staff, PhD students, and post-doctoral fellows. As of 2015, the CESP will be organized as 9 teams with research on major public health areas, including the epidemiology of cancer and renal, vascular, and sexually transmitted diseases (HIV), health services research, aging, gender and sexual health, and infertility.

The anticipated hire date is January 1, 2015 but can be earlier. Deadline for applications is May 1, 2014; review of applications will continue until a successful candidate has been identified. Salary is competitive and depends on qualifications and experience.

Applicants are requested to prepare a single PDF file that contains letter of interest, curriculum vitae, and a statement of research and teaching interests.

Address correspondence to: cesp2015@inserm.fr

APHEA is looking for reviewers

The Agency for Public Health Education Accreditation (APHEA) focuses on the accreditation of Master level public health degrees throughout the European Higher Education Area.

This year the agency is conducting a recruitment drive for new reviewers and we are especially keen that public health stakeholders join in these processes.

If you are a senior; public health practitioner, academic, staff member at an institute of higher education, accreditation agency or similar organization we would encourage your application.

This year the agency will also be conducting reviewer training on May 27th in Zagreb, Croatia, for which several subsidised places are available.

For further details please visit www.aphea.net under the page "application for site visitors" or simply write to Julien Goodman on julien.goodman@aphea.net

Research group for Evidence Based Public Health (Germany) 3 PhD positions

For 2 years in the first instance, with the option of an additional extension (Conditional on release of budgetary funds).

The University of Bremen (Institute for Public Health und Nursing Research) and the Leibniz-Institute for Prevention Research and Epidemiology – BIPS GmbH initiate jointly a cooperative research group for Evidence Based Public Health starting April 1st, 2014. The interdisciplinary research program intends to apply quantitative and qualitative research approaches to policy

relevant research questions, in particular concerning life-style related risk factors for chronic diseases. The aim of the research group is to conduct research structured along the policy cycle, i.e. (a) systematically reviewing evidence, (b) quantifying the expected impact of different interventions for the target population, and (c) communicating findings to policy makers.

The applicant should have interest or prior exposure in one or more of the following research topics:

- systematic reviews (preferably using Cochrane methodology)
- risk factor epidemiology, in particular obesity, alcohol, or tobacco
- modelling or projecting population-level health consequences of changes in risk factor exposure
- policy relevant public health research / impact assessment
- public health economics

The position requires an advanced degree in one of the following (or related) areas:

- Public Health / Environmental Impact Assessment
- Demography / Epidemiology
- Health Economics / Statistics

We welcome applications from highly qualified and motivated early-career scientists of all nationalities. The successful applicants will be employed by the University of Bremen which offers an innovative research support structure for doctoral studies. We look forward to receiving your complete application incl. a work sample (e.g. master thesis, publication, etc.) and details of two contactable referees as soon as possible via email:

Stefan K Lhachimi (Cooperative Research Group Leader) ebph.jobs@gmail.com

Research group for Evidence Based Public Health (Germany) Post Doc position Post-Doc / Research Associate

1 full time position for 3 years in the first instance, with the option of an additional extension (Conditional on release of budgetary funds).

The successful applicant will have experience—or show the capacity—in conducting policy relevant public health research. The aim of the research group is to do research structured along the policy cycle, i.e. (a) systematically reviewing evidence, (b) quantifying the expected impact of different interventions for the target population, and (c) communicating findings to policy makers.

The applicant should have experience in one or more of the following research topics:

- systematic reviews (preferably using Cochrane methodology)
- analysing epidemiological data (preferably to generate epidemiological evidence such as prevalence or incidence)
- modelling or projecting population-level health consequences of changes in risk factor exposure
- cost-effectiveness analysis for population level interventions /public health economics

The position requires a (nearly completed) PhD in one of the following or related areas:

- Public Health / Environmental Impact Assessment
- Demography / Epidemiology
- Health Economics / Statistics

We welcome applications from highly qualified and motivated early-career scientists of all nationalities. The applicant will be employed full time by the BIPS. We look forward to receiving your complete application: cover letter, curriculum vitae, key publications and details of three contactable referees as soon as possible via email:

Stefan K Lhachimi (Cooperative Research Group Leader) ebph.jobs@gmail.com

4. Interesting News

Report on National Action to Address Child Intentional Injury by the European Child Safety Alliance

We are pleased to announce the launch of the report on National Action to Address Child Intentional Injury, by the European Child Safety Alliance with the support of Vice President of the European Parliament Isabelle Durant and Chair of the European Network of Ombudspersons for Children Bernard de Vos,

The report and press release are available at www.childsafetyeurope.org

The report describes the prevalence of intentional injuries to children in the European Union, including maltreatment, peer to peer violence and self-directed violence, and examines the level of uptake of national level policies to address intentional child injuries in over 25 Member States. This is the first time that national actions to address child intentional injury are being comprehensively assessed and reported on in the EU.

Within the report are individual country policy profiles for each of the participating Member States. Austria, Belgium (Flanders only), Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain and Sweden and the United Kingdom (England and Scotland only).

6. Upcoming courses and conferences

Going International promotes training and further education for experts and newcomers in public health and humanitarian assistance around the globe. The flagship of Going International is the online education database »medicine & health«. It contains international courses, master programmes and conferences in the field of medicine and international health. Due to the large number and variety of training events the education database enables health professionals to find their educational event at their fingertips. For further information: www.goinginternational.eu/en/online-datenbank/ Going International is an official partner of EUPHA.

FEATURE

[New WHO analysis shows alarming rates of overweight children](#)

Across the WHO European Region, more and more children are now overweight and obese. What can be done, and who needs to take action to stop overweight becoming the new norm? [Photo story – How can the obesity epidemic in children be stopped?](#)
[Country profiles on nutrition, physical activity and obesity](#)

NEWS

[Over 5% of the world's population has disabling hearing loss](#)

03-03-2014

WHO estimates that 360 million people have disabling hearing loss. It assists countries to develop programmes for primary ear and hearing care that raise awareness, provide support and technical guidance to health care workers and promote social inclusion for people with hearing loss.

[Joint position paper on United Nations support for Roma inclusion](#)

26-02-2014

"The role of the United Nations in advancing Roma inclusion" identifies a number of crucial areas where United Nations (UN) agencies can add significant value to work to achieve Roma inclusion and development.

[Global health security: all sectors and countries needed](#)

12-02-2014

Wide international travel and globalized trade offer extraordinary opportunities for the international spread of disease. Today, a health threat in any part of the world is a health threat to any population around the world. In the WHO European Region, 21 countries have requested extensions to the deadline set for developing the core capacities for implementing the International Health Regulations (IHR): June 2014.

RECENTLY PUBLISHED

[Health-sector involvement in chemicals management at the national level: review of current practice](#)

The chemical industry is one of the world's largest economic sectors, which, if managed improperly, poses risks to human health and the environment. This publication presents practical examples of health-sector involvement in chemicals management in selected countries around the world.

[Hospitals and borders. Seven case studies on cross-border collaboration and health system interactions](#)

How do hospitals interact with each other and with other health care actors across borders? Why does cross-border collaboration take place? Who actually benefits from it? And when does it work? Seven case studies examine the circumstances under which cross-border collaboration is likely to work, the motivations and incentives of health care actors and the role played by health systems, individuals and the EU in shaping cross-border collaboration.

[Health and environment: communicating the risks](#)

Public administrations at all levels must often manage complex situations related to environmental determinants of health, often surrounded by controversy. There is a need, in such circumstances, to assess the extent of possible effects on health and the environment and to manage information, evidence and communication on possible risks, while understanding and taking into consideration stakeholders' opinions, interests and values.
